SUBJECT INDEX, VOLUME 55

Acrylamide, crosslinked gel, diffusion in, 731
persulfate-metabisulfite initiator, 713
and 4-vinyl pyridine, grafted to nylon 6.6, 721
Alkynes, polymerization by Ziegler-type catalysts, 137
Amylopectin, number-average DP, 437
Amylose, derivatives, properties, 657
number-average DP, 437
Anhydride, itaconic, styrene copolymerization, 297
Aromatic polymers, synthesis and properties, 675
Benzoyl peroxide, decomposition in polymers, 33
Block copolymers, based on 2,2-bis(4-hydroxyphenyl)propane polycarbonate, 343
Block polymerization, photopolymerization, 767
p-Bromoaniline, in *N*-carboxylglycine anhydride polymerization, 515
N-Carboxylglycine anhydride, polymerization, 515
Catalyst, Al–$TiCl_4$, kinetics of ethylene polymerization, 321
titanium trichloride–triethylaluminum, 25
Ziegler-type, polymerization of alkynes, 137
Cationic polymerization, inversion temperature, 311
Cellulose, heterogeneous hydrolysis, 779
Cellulose–ethylenediamine complex, decomposition by DMF, 395
Chains, infinite, helical parameters, 215
inorganic, hydrolytic stability of side groups, 89
Collagen, fibrils, and products from enzymic treatment, 113
Condensation products, preparation and and crosslinking properties, 65
Conjugated bonds, collective interactions in polymers, 563
and heteroatoms in conjugated chain, 621
Copolymer, block, preparation and properties, 343
styrene–α-methylstyrene, radiation effect, 71
triallyl cyanurate, triallyl isocyanurate, and diallylmelamine, 41
Copolymerization, dimethyl propene-2-phosphonate and styrene, 259
itaconic anhydride and styrene, 297
rates of addition of monomers (*erratum*), S6
Crystal structure, polyketone, 811
Crystallization, polycapramide, kinetics, 753
Crystallographic data, various polymers, 643
Cumene hydroperoxide, in radical polymerization, 49
Degree of polymerization, number-average, amylose and amylopectin in starch, 437
Diallylmelamine, copolymerizations, 41
Dimethyl propene-2-phosphonate, styrene copolymer, 259
Dimethylformamide, decomposition of ethylenediamine–cellulose complex, 395
Dimethylsiloxane, PMR relaxation in polymers, 361
2,4-Dimethyl-6-vinyl-*s*-triazine, polymerization, 303
Elastomer, from chlorophosphonated polyolefin, 799
trifluoronitrosomethane/tetrafluoroethylene, 609
End products, enzymic treatment of collagen fibrils, 113
Ethylene, high-pressure peroxide-initiated polymerization, 285
polymerization with Al–$TiCl_4$, kinetics, 321
Ethylendiamine–cellulose complex, decomposition by DMF, 395
Flory-Rehner theory of swelling, anisotropic system, S29
Fractionation, and phase equilibrium of polymer solution, 597
Graft, photopolymerization, 767
radiation-induced, Trommsdorff effect of methanol, 663
Homopolymerization, maleic anhydride, S31
Hydrocarbons, and hydrocarbon polymers, effect of formates, 353
Hydrolysis, heterogeneous, of cellulose, 779
2,2-bis(4-Hydroxyphenyl)propane polycarbonate, block copolymers, 343
Impurities, donor-type, influence on propylene polymerization, 25
Infrared spectra, poly(1,4-cyclohexylenedimethylene terephthalate), 263
Inhibitors, oxidation, efficiency for rubber, 489
Initiator, cumene hydroperoxide in radical polymerization, 49
persulfate-metabisulfite in acrylamide polymerization, 713
Isomerism, *cis-trans*, effect on polyurethanes, 507

Isomerization, *cis-trans*, polybutadiene, 827
Maleic anhydride, homopolymerization, S31
Membranes, preparations, 233
Methacrylic anhydride, copolymerization with vinyl monomers, 197
Methanol, Trommsdorff effect, radiation-induced graft, 663
α-methyl group, PMR of polymers and monomers, 181
α-Methylstyrene, styrene copolymer, radiation effect, 71
Molecular size distribution, and MW averages, evaluation, 423
Molecular vibrations, high polymers, 215
Molecular weight, and molecular size distribution, evaluation, 423
Norbornylene, synthesis and polymerization, 525
Nucleic acids, and polynucleotides, 1
Nylon 6.6, radiation-induced graft copolymerization, 721
Oligoesters, viscosity, 411
Osmotic pressure, rapid dynamic determination, 381
Ozone, reaction with natural rubber surfaces, 387
Phase equilibrium, polydispersed polymer solution, 597
Phosphates, condensed, 81
Photopolymerization, graft and block, 767
PMR, α-methyl group-containing polymers and monomers, 181
  relaxation in dimethylsiloxane polymers, 361
Polyacrylonitrile, 531
Polyamide, optically active, structurally homogeneous, S32
Polybutadiene, sulfur-induced *cis-trans* isomerization, 827
Polycapramide, crystallization kinetics, 753
Polycarbonates, chemical conversions, 251
Poly(1,4-cyclohexylenedimethylene terephthalate), infrared spectra, 263
  x-ray diffraction, 275
Polyhydrocarbons, chlorinated isotactic, 169
Polyketone, crystal structure, 811
  intramolecular rearrangements, 741
Polymethyl methacrylate, adsorption from solution, 123
Polymethylsiloxane, rearrangement by hydrogen chloride, 57
Polynucleotides, and nucleic acids, 1
Polyolefin, chlorophosphonated, new elastomer, 799
Polypropylene, spherulitic crystallization and cracking, 443
Polystyrene, thermodynamics, 497
Polyurethanes, effect of *cis-trans* isomerism, 507
Polyvinyl acetate, polyvinyl chloride copolymer film, gas and vapor diffusion, 683, 699
Polyvinyl alcohol, and iodine, effect of stereoregularity, 335
Polyvinyl chloride, polyvinyl acetate copolymer film, gas and vapor diffusion, 683, 699
Poly(vinyl trifluoroacetate), 531
Polyvinylidene fluoride, infrared transmission of decomposed polymer, 551
Propylene, influence of donor-type impurities in polymerization, 25
Radiation, crosslinking and scission, 465
  decomposition products and mechanisms, 477
  degradation, 451
  effect on styrene–α-methylstyrene, 71
  graft, Trommsdorff effect of methanol, 663
  ultraviolet, degradation, 451
Radical polymerization, cumene hydroperoxide-initiated, 49
Reactivity ratios, itaconic anhydride and styrene copolymerization, 297
Rearrangement, intramolecular, of polyketones, 741
  of polymethylsiloxane by hydrogen chloride, 57
Rubber, efficiency of oxidation inhibitors, 489
  natural, reaction with ozone, 387
Side groups, hydrolytic stability, 89
Silicon tetrachloride, preparation and crosslinking of condensation products, 65
Silicones, differential thermal analysis, 419
Spherulite, crystallization and cracking in polypropylene, 443
Stereoregularity, effect on polyvinyl alcohol–iodine reaction, 335
Structure, high polymers, 215
Styrene, anhydride copolymerization, 297
  dimethyl propene-2-phosphonate copolymer, 259
  α-methylstyrene copolymer, radiation effect, 71
  thermodynamics, 497
Temperature, inversion, cationic polymerizations, 311
  low, collective interactions in polymerization, 563
Tetrafluoroethylene, trifluoronitrosomethane elastomers, 609
Tetramethyldisiloxane diol, preparation and crosslinking properties, 65
Thermal analysis, differential, silicones, 419
Thermodynamics, polystyrene and styrene, 497
Triallyl cyanurate, copolymerizations, 41
Triallyl isocyanurate, copolymerization, 41
B-Triallyl-*N*-triphenylborazine, polymerization, 153
Trifluoronitrosomethane, tetrafluoroethylene elastomers, 609
B-Trivinyl-*N*-triphenylborazine, polymerization, 153
Trommsdorff effect of methanol, radiation-induced graft, 663

Ultraviolet, crosslinking and scission, 465
  decomposition products and mechanisms, 477
  degradation, 451
Vinyl, containing boron, polymerization, 153, 161
  copolymerization with methacrylic anhydride, 197
Vinyl chloride, vinylidene chloride copolymers, 95, 821
Vinylidene chloride, vinyl chloride copolymers, 95, 821
p-Vinylphenylboronic acid, polymerization, 161
4-Vinyl pyridine, and acrylamide grafted to nylon 6.6, 721
Viscometer, improved suspended-level, S27
Viscosity, oligoesters from terephthalic acid and glycol, 411
X-ray diffraction, poly(1,4-cyclohexylenedimethylene terephthalate), 275
Ziegler-type catalysts, polymerization of alkynes, 137
